GILES G-202

875 mm | 915 mm | 180g | Li-pol 2s 450-600

FLEXFOAM

modellmarkt24.ch

Important!

This aircraft is not suitable for beginners, as the assembly process is more complex compared to EPP models.For many joints, we recommend using UHU Por instead of CA glue – it provides significantly better bonding strength on this material.For other parts, standard thin CA glue can be used.

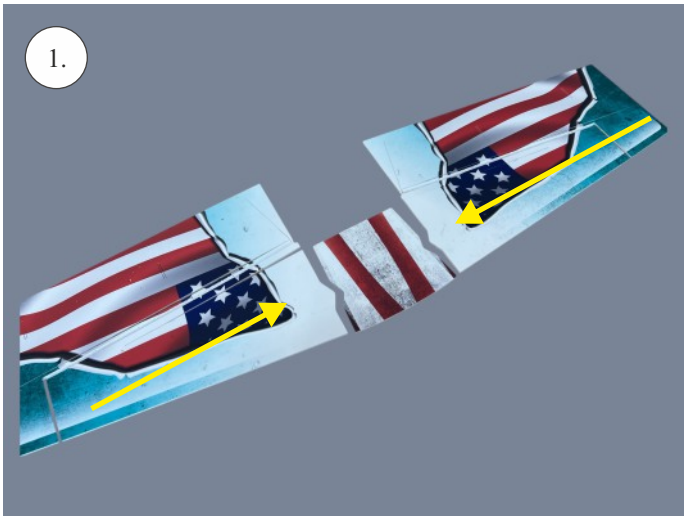

Yellow arrows indicate joints that should be glued with UHU Por

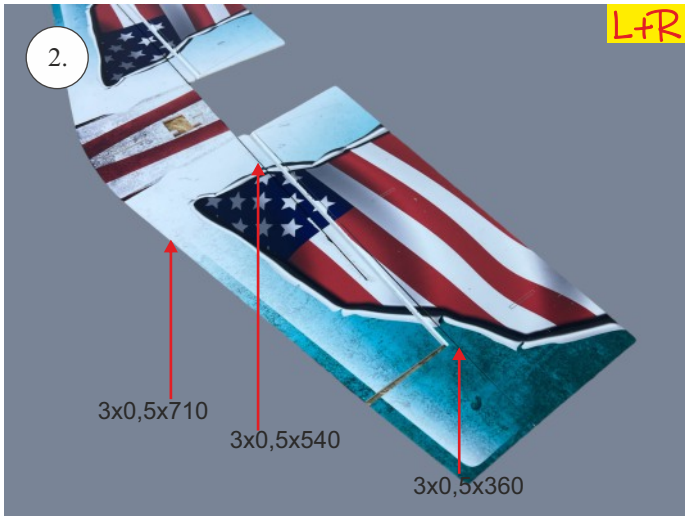

Red arrows indicate joints for CA glue
