TRAXXAS

TRX-4™
TACTICAL UNIT

OUTFITTED FOR ADVENTURE

READY FOR FUN!

The Traxxas TRX-4 Tactical Unit is a rapid-response vehicle designed to charge into practically any situation, emerging unscathed and ready for the next fun adventure. From broken concrete and back-alley climbing, to mud, rocks, and streams, this all-terrain machine easily conquers it all. The Tactical Unit shares the highly innovative features and capability of the TRX-4 Scale and Trail Crawler, but includes a rugged, lightweight tactical body for increased agility. Where other trucks fear to go, the Tactical Unit charges full-steam ahead!

THE POWER OF PORTALS

EXCLUSIVE FEATURE

Without Traxxas portal axles, your tires would need to be over 1" taller to achieve the same axle-to-ground clearance as the TRX-4 Chassis.

MODEL: 82066-4

3s Power System

The new XL-5 HV electronic speed control brings 3S LiPo capability and new profiles. A new Trail profile facilitates smooth driving for most of your adventures, while a new Crawl profile introduces hill hold and instant reverse for extremely technical courses. Long run times, up to 2 hours, are possible with a Traxxas 3S 5000mAh iD LiPo battery pack!

Batteries and charger sold separately

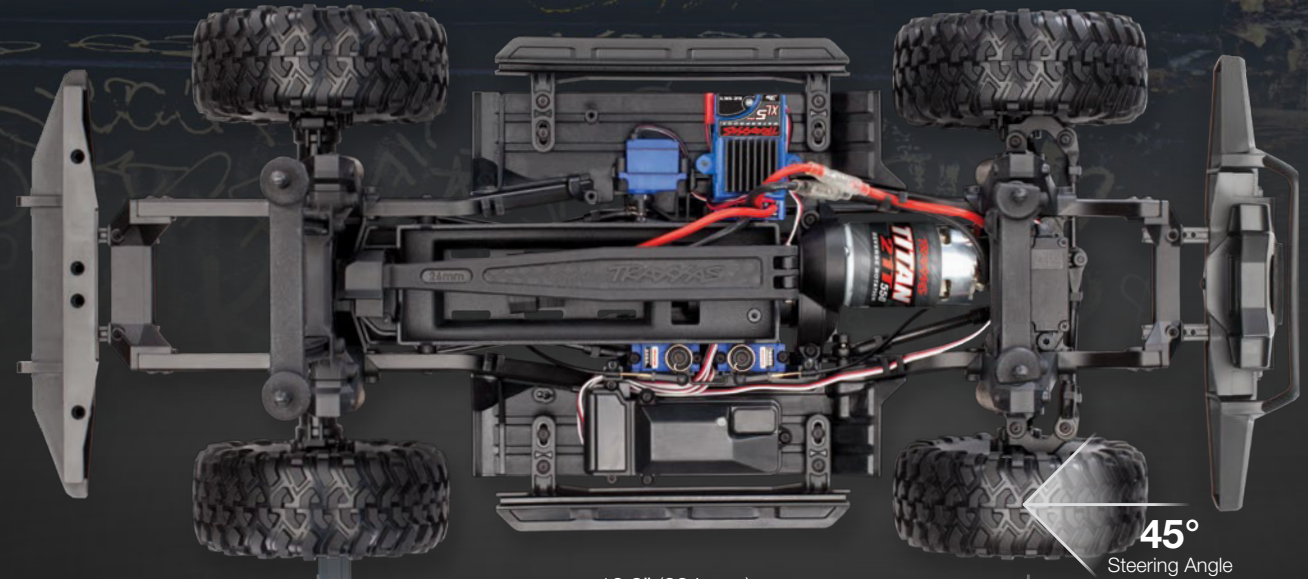

Traxxas Tough

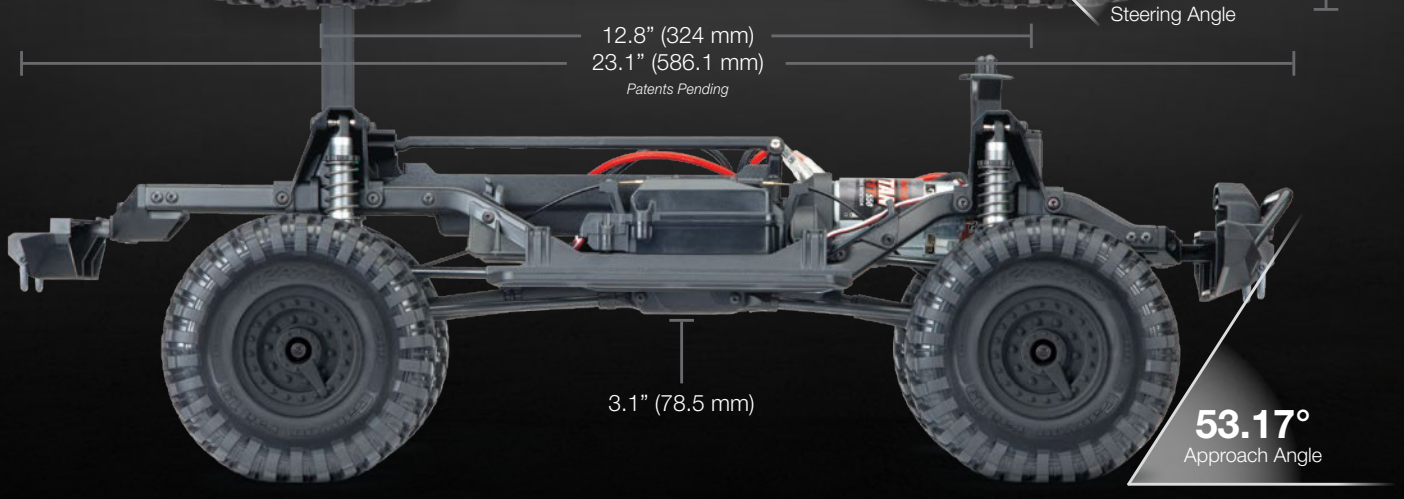

Leave the tools in the bag! The Traxxas TRX-4 chassis is built to handle the rigors of remote locations and all-day driving fun. The foundation begins with a pair of 1.5mm thick steel frame rails. Large diameter steel links and heavy-duty, extra-wide rod ends keep the suspension firmly mounted. Hardened steel u-joints are ultra reliable, while the brushless-ready steel portal axle and transfer case gears are smooth and quiet.

Scale Detail

Scale details include functional spare wheel and tire, an off-road jack, and spare fuel canisters. The rugged bumpers provide clearance and protection and are equipped with recovery D-rings. The front bumper is designed to be compatible with many popular off-road accessories.
