TRAXXAS

AVAILABLE EARLY JULY

TRX-4 SPORT

LIGHTWEIGHT SPORT BODY

PURPOSE BUILT.

The TRX-4 Sport combines the unbeatable ground clearance and driving dynamics of Traxxas portal axles, sticky Canyon Trail™ tires, and a lightweight pickup truck body for a leaner, performance-focused new TRX-4.

Whether it's a fun trail run or a hardcore technical crawl, the TRX-4 Sport's capability and purpose-built approach takes your outdoor adventures to a new level.

THE POWER OF PORTALS

Without Traxxas portal axles, your tires would need to be over 1" taller to achieve the same axle-to-ground clearance as the TRX-4 Chassis.

MODEL: 82024-4

3s Power System

The XL-5 HV electronic speed control brings 3S LiPo capability and dedicated profiles designed for the rocks or the trails. Long run times, up to 2 hours, are possible with a Traxxas 3S 5000mAh iD LiPo battery pack!

Batteries and charger sold separately

Traxxas Tough

The Traxxas TRX-4 chassis is built to handle the rigors of remote locations and all-day driving fun. A pair of 1.5mm thick steel frame rails, large diameter steel links and heavy-duty rod ends keep the suspension firmly mounted. Steel throughout the drivetrain ensures worry-free performance.

Purpose Built

Full-time locked differentials and a tough single-speed transmission keep the focus on all-out performance on the rocks. When combined with the Sport's lightweight body and steeper approach angles, the result is extreme capability and nearly unstoppable fun.

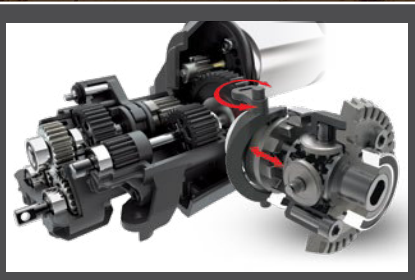

Metal Gear Servo

TRX-4 Sport's full-metal gear digital servo gives you the durability and steering authority you need to confidently and reliably power through tough challenges.

Waterproof Electronics

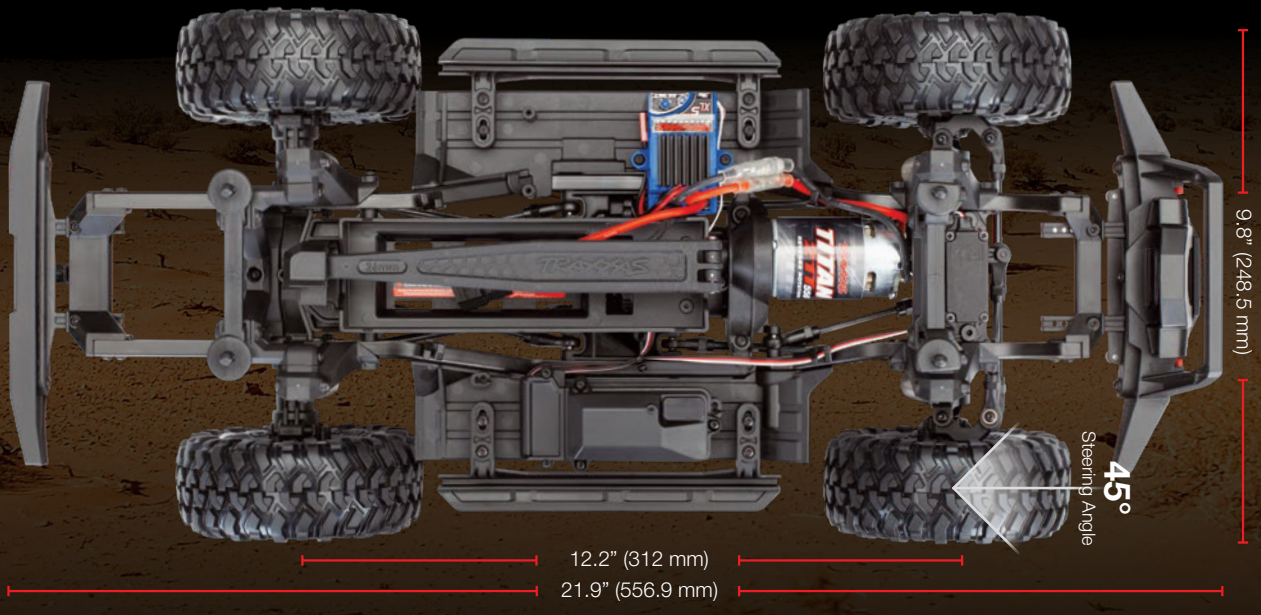

The TRX-4 is fully waterproof, not "splash resistant". There is a big difference. Traxxas' patented innovation gives you the freedom to tackle creeks, snow, and mud without worrying about water in your electronics.

Fully Upgradeable

The Sport is built on the versatile TRX-4 platform, and is ready to accept the full line of genuine Traxxas accessories.

#8195 Locking Differential Kit (Front and Rear)
#8196 Two-Speed Conversion Kit
#6507R TQi 4-Channel Radio System
#8140/X/R Long Arm Lift Kit
